When it's time to build a new worship facility for a growing community or, if you simply need to expand your existing facility, Star Building Systems, a leader in the custom metal buildings industry, can provide your building committee with flexible, economical solutions that will meet your long term needs.

Star buildings can be used for sanctuaries, multi-puruse facilities, classrooms, whatever the need. Each Star building is individually designed and engineered to meet your exact requirements as well as local building codes. High ceilings and column-free interiors provide flexibility and uninterrupted floor space for maximum seating requirements.

Your Star building will blend well with any conventional exterior. A mixture of glass, brick, stone and other veneers will accent your building's beauty and will compliment the atmosphere already created by your congregation.

Future maintenance and energy cost considerations are a major concern and they receive major attention. Performance-proven quality materials used
