Warehousing goods and products has become a high-tech undertaking. Space, maintenance, durability, expandability and cost are major concerns when companies begin planning any warehouse project.

Making these concerns minor is what Star Building Systems has been doing for almost 90 years, by providing attractive, functional, expandable warehousing facilities.

Each Star building is individually designed and engineered to meet your exact requirements as well as local building codes. Column-free interiors can provide uninterrupted floor space. No stacking and no driving around columns. All the open space you need as high as you need it. These systems enable a more profitable, smoother material handling process to be implemented.

Your Star building can be customized to fit your special requirements. Docks, large column-free interior spaces, mezzanines for office areas or additional storage, or crane systems for moving materials are all features that a Star building can easily accommodate.

Future maintenance and energy cost considerations are a major concern and they receive major attention. Performance-proven quality materials used in manufacturing insure savings on future upkeep and maintenance. A Star building offers optimal efficiency and is termite and fire resistant. When it's time to expand, Star can provide the answers. Star Building Systems provide the flexibility to add on in an easy and attractive way.

So, when it comes to designing and building your new warehouse facility, or expanding your current facility, call Star Building Systems. Your local Star Builder can provide a single source of responsibility and consult with you about site selection, topographic conditions and interior and exterior design to meet your long term objectives.

Call Star Buildings at 1-800-879-7827 for the name and telephone number of a Star Builder near you. Or visit our website, www.starbuildings.com, to learn more about Star Building Systems.
